

# Funds allocation

## Company Reserves:

Company reserves will mainly be used to establish a delegate program to support independent validators by staking on their behalf. In order to achieve this, application requirements will include that an applicant must prove that they are solely reliant on renewable energy sources. The company reserves will not be introduced to the market and solely be used in the staking pools to provide a healthy liquidity to EXNode and to ensure the stability of the network.

## Product and Tech Growth:

Product and tech growth funds are reserved to further develop Grid and expand the available decentralized tools on Grid. All funds used from this allocation will be solemnly used in the direct benefit of expanding the GRN Grid blockchain.

## Marketing:

Marketing funds are leveraged as an incentive to attract more ambassadors and to promote the usage of blockchain/ Grid by hosting tech events/hackathons and community conventions.

## Liquidity:

Liquidity funds will be provided to the market only upon the listing of GRN on a new centralized exchange. New exchange listings generate a surge in demand from new users, resulting in inefficient market pricing and increased volatility. Hence, GRN tokens will be deliberately released at these events to encourage healthy GRN market cap and liquidity development.

## Charity:

Charity funds are reserved for the GRN organization's Giving Back operation and other charity organizations with similar visions. Metabolic and the GRN community serve as a watchdog to ensure that these charity funds are used correctly. Charity funds are fully locked for the next two years, with the purpose of ensuring that the GRN organization has enough time to carefully examine how to implement the allocation of the funds and how to maintain this procedure decentralized. The GRN organization is especially interested in instituting a voting system based on the possession of \$G. In addition, we will institute a suggestion and feedback process accordingly.

# Release schedule

Graph below showcases the vesting schedule and the full available GRN tokens to the GRN Association team.

Category	Allocation (%)	Unlocked (%)	Vesting
Community fund	500M (50.0%)	0M (0.0%)	Unlocked exponentially
Early Birds and Private sale	100M (10.0%)	70M (7.0%)	100% of unsold tokens will be locked in company reserve
Charity	30M (3.0%)	0M (0.0%)	2 year initial lock. After 2 years: 10 % of the lock is unlocked every 6 months
Liquidity	50M (5.0%)	10M (1.0%)	1 year initial lock. After 1 year: 10 % of the lock is unlocked every 6 months
Marketing	70M (7.0%)	5M (0.5%)	1 year initial lock. After 1 year: 10 % of the lock is unlocked every 6 months
Company reserves	100M (10.0%)	20M (2.0%)	1 year initial lock. After 1 year: 10 % of the lock is unlocked every 6 months
Product / Tech growth	80M (8.0%)	5M (0.5%)	10 % of the lock is unlocked every 6 months
Partners	70M (7.0%)	20M (2.0%)	10 % of the lock is unlocked every 6 months
<b>Total</b>	<b>1.000M</b>	<b>130M</b>
